

Products:

Specifications of Ebeko leather shoes:

Protection: leather shoes protect your feet against hot liquids and small objects falling down.

Flexibility: leather shoes are very comfortable to wear and easily take the shape of your feet.

Durability: leather shoes are rarely damaged and they also have a longer shelf-life compared to other types of shoes.

Light and stylish style: leather shoes look very stylish and attractive since they are made of natural materials.

Ebeko leather shoes size:

Different models:

Leather shoes for women

In sizes of 35 to 41

Different types of leather shoes for women:

Flat shoes: their light weight and air flow has made this shoe a good choice for summer

Leather sneakers: sneakers are one of the most popular models among customers. They are both casual and comfortable.

Medical leather shoes: the leather used in these shoes flows the air in and out of the shoe, which is suitable for the foot hygiene and prevents sweating and bad odor.

Sandals: no sweating and with suitable insole
Leather boots and ankle boots: they do not allow water to permeate into the boots in cold and rainy seasons.
Leather high-heels: high-heels are the most popular shoes among women and their surface is made of natural leather in different designs and colors.

Leather shoes for men:

In sizes of 39 to 46

Flat leather shoes: they have short heels and flat soles and they fit most of styles.

Leather sneakers: leather sneakers for men are normally suitable for sports, walking or daily activities.

Leather sandals: Today, leather sandals are very suitable for summers.

Boots and ankle boots: Ebeko leather boots are the most flexible and comfortable boots for men

Leather dress shoes: they are very popular and suitable for formal settings and styles.

Leather medical shoes: these types of shoes protect heels and makes it very easy for people to walk.

Packaging:

The size of the shoe box depends on the produced type of shoe. The most common sizes are small, medium and large depending on centimeters and the size of height, width and length:

Small size with dimensions of 12*21*30

Medium size with dimension of 13.5*23*35

Large size with dimensions of 18.5 *21*30

One-piece, two-piece, sliding, and book cardboards as well as hard box packaging, also known as hard boxes, are used in shoe packaging. In the production of shoe cardboards, they are produced in 3 forms regardless of the models: With print, without print and in the form of laminate. The models of the boxes are designed and approved by the best designers in the leather shoe industry based on the culture of customers.
